

### gp\_ece\_savedata.m

*gp\_ece\_savedata*(shot, t\_start, t\_end, scp, [remote])

Program to download, save and secure copy ECE data from a given **shot** in the [t\_start, t\_end] timerange. Secury copy via ssh to **remote** if **scp** is 1.

Remote has a default value.

Creates needed directories before saving.

Uses *SF2ML*.

example:

*gp\_ece\_diag*(20975,0,6,1, 'user@machine:/directory/')
